

## PROJECT REPORT

### INTRODUCTION:

Our project is based on Javascript and HTML to create a Balloon Shooting Game.

### PROBLEM:

Try to aim for the moving balloons using the MOUSE POINTER and HIT with projectile BALL to the balloons.

### SOLUTION:

- Aim the MOUSE POINTER for the angle of the projectile.
- PRESS 'a' KEY to shoot.
- You cant shoot another ball UNTIL one ball moves out of the screen.

### CONCLUSION:

- Experienced working in a team, facing errors many times and resolving them with patience,making a package of files and interlinking them instead of working in a single file.
- Got used totaking help from official documentation and other resources like Stackoverflow.

### TEAM MEMBERS:

- Abhinav H Kamath (IMT2019001)
- Yashovardhan Reddy(IMT2019097)
